MFD

MOBILE WELDING FUME EXTRACTOR

The MFD is a mobile filter unit with integrated fan that provides extraction and filtration for use with a flexible extraction arm or extraction hose.

The MFD features an aluminum spark arrester and a square disposable cellulose filter cartridge. This filter cartridge is provided with a precoat to extend the life span and increases initial operating efficiency of the filter. A filter pollution indicator indicates when filter replacement is required.

Thanks to the four transport wheels (two of which are swivel casters), the MFD is extremely suitable to be used in relatively small facilities or near sources of pollution without a fixed location. Extraction arm/hose to be ordered separately.

APPLICATIONS

The MFD is intended to be used for the following applications:

- MIG-MAG/GMAW welding (annual use: <700 kg/1500 lbs)
- TIG welding
- FCAW welding (annual use: <700 kg/1500 lbs)
- stick/MMAW welding (annual use: <500 kg/1100 lbs)

Do **not** use the MFD for the following applications or in the following circumstances:

- arc-air gouging
- aluminium laser cutting
- oil mist
- heavy oil mist in welding fume
- extraction of aggressive fumes and gases (e.g. from acids, from alkaline, from soldering paste containing lithium)
- extraction of hot gases (more than 45°C/113°F continuously)
- grinding aluminum and magnesium
- flame spraying
- extraction of cement, saw dust, wood dust etc.
- sucking cigarettes, cigars, oiled tissues and other burning particles, objects and acids
- explosive environments or explosive substances/gases
